IT / AI Intern – Daily Deliverables

Company: House Unlimited Nigeria
Location: Wuse Zone 4, Abuja, FCT
Reports To: CEO / HR Manager

1. IT Infrastructure & Technical Support

Tasks:

- Check office desktops, laptops, printers, and Wi-Fi for issues.
- Troubleshoot minor hardware/software problems.
- Apply system updates, antivirus, and security patches.
- Escalate unresolved or critical issues to CEO/HR.

Expected Output:

- Daily IT support log in Task Tracker.
- 95% of issues resolved within 24 hours.
- System uptime maintained; downtime <2 hours/week.

2. Website & Google My Business (GMB) Management

Tasks:

- Monitor company website 2× daily (10 AM & 3 PM) for:
  - Page speed, responsiveness, and broken links
  - Updated property listings and content
  - SEO optimization (keywords, meta tags, internal links)
- Manage Google My Business profile:
  - Post new listings and updates
  - Respond to client reviews and messages promptly
  - Track local search ranking improvements

Expected Output:

- Daily website & GMB check report.
- At least 1 listing or content updated per day if needed.
- Document SEO improvements and local ranking progress weekly.

3. Blog Research & Posting

Tasks:

- Research real estate topics relevant to our audience (e.g., property investment tips, market trends).
- Draft blog posts or outlines for review by Team Lead.
- Post approved blog content on website or social channels.
- Optimize blogs for SEO (keywords, meta tags, internal linking).

Expected Output:

- At least 1 blog research insight or draft daily.
- Weekly blog published (if approved).
- SEO documentation for blog posts.

4. Data Management & Dashboard Support

Tasks:

- Update property and client databases daily for accuracy.
- Maintain dashboards for leads, inquiries, and property status.
- Provide weekly insights for marketing, sales, and management.

Expected Output:

- Accurate database updates daily.
- Weekly dashboards or simple reports by Friday 4 PM.
- Track performance of campaigns or listings.

5. AI & Productivity Tools Research

Tasks:

- Identify AI tools to help employees perform work tasks efficiently. Examples:
    - Chatbots for client inquiries
    - Automation tools for emails, reminders, or reports
    - AI content assistants for marketing/social media
    - Tools for data visualization or analysis
- Test and document functionality of 1–2 tools daily.

- Train employees on using these tools effectively.
- Proactively **come up with AI-related ideas** to improve workflows.

Expected Output:

- Daily AI research log in Task Tracker.
- Weekly session to educate team members on using AI tools.
- Minimum 1 new tool or improvement idea recommended weekly.

6. Security & Compliance

Tasks:

- Ensure daily backups of databases, website, GMB info, and other digital assets.
- Check for unauthorized access or security breaches.
- Educate employees on basic IT safety practices.

Expected Output:

- Log backups and security checks in Daily Tracker.
- Zero data breaches or incidents.
- Weekly tips/training shared with team.

7. Reporting & Documentation

Tasks:

- Update **Daily Task Tracker** by 5 PM:
    - IT issues resolved
    - Website & GMB updates
    - Blog research & posting updates
    - Data updates & dashboards
    - AI research & training sessions
    - Security checks
- Submit **Weekly Summary** every Friday by 4 PM, including:
    - Website & GMB performance
    - Blog performance
    - AI tool adoption and training outcomes
    - IT support overview
    - Data dashboards and recommendations
